

Name: Stas Byalkovskiy
Address: 5 Troicka street Odessa
Email: kotetratata@gmail.com
Telegram: 0937105266
Viber: 0937105266
Phone number(mobile): 0937105266
Marital status: Single
Date of birth: 24th December 1993
Nationality: Ukrainian

Fluent Russian, Ukrainian; English upper-intermediate.

Known technologies: **HTML, CSS, JS, Pug, SASS, npm, node.js, Parcel, React, Git, Goomla and Modx**

Also know basics of **C++, Python, Go.**

Know how find the way to communicate with any kind of people.

High learning speed.

English level – enough to read any kind of documentation and to take a part in common talk. For conversations on specific or technical topics, I may need to look into the dictionary sometimes.

Work experience in IT- few month of internship in web company and creating some cases on freelance. If we speak about work in general: from the young years have worked as an advertiser, after, as a loader and as an animator in kid`s entertainment complex.

What about personal qualities? I think that my best sides are:

- ability to see whole picture;
- understanding that primordial things important;
- inquisitiveness;
- the desire to improve something I`m interested in;
- quick mind (high learning speed and good memory);
- good in communications;
- stress resistant.

Finished one of the best Odessa`s school (**OSS #117**). Took part and won in a variety of competitions in such subjects as mathematics, physics, geography at the city and regional level.

Then entered on a budget in **Odessa National Polytechnic University**/Institute of Energy and Computer Integrated Management Systems/Department of Automation and computer-integrated technologies for 2011-2013 then left it. (now there are 2 different departments).

Also entered on a budget **Odessa National Economy University** / Finance and Economy Department for 2013-2015 then left it too.

Both times haven`t enough interest to knowledge that was given there and to style of communication and people relations.

Then tried myself in cybersport and after colliding with the harsh reality, I realized that in our country, with my level of play and current state of affairs, I have to change my occupation.

Have finished a lot curses on codecademy.com. Used to have practice by resolving puzzles on codingame.com. Everyday reading articles or some specification about something I don`t know yet.

For today trying to become web-developer focused on front-end and actually on JavaScript with the accompanying technologies.

C++ level limited by the basic syntax and execution of laboratory and course works in VStudio with creating some simplest GUI for Math functions (like counting specials integrals). For now, I`m completing puzzles on codingame.com and trying to up my skills in all directions.

Also was playing professional basketball till my 16 then played for the universities and now it`s my hobby, love chess and also something that can load my brain.
